Hong Kong has a thriving film, TV and fashion industry with very little knowledge of prosthetic makeup, and therefore, we often hire professionals from America, UK or Beijing due to lack of local talent. There is a great demand for quality prosthetic makeup artists worldwide. Many of the big budget movies need large numbers of prosthetic artists from worldwide. Asia has a booming film industry and it is the right time for you to learn the professional skills from Robin Pritchard.

## Who should take this workshop?

Suitable for makeup artist or anyone who has an interest in prosthetic makeup in film, TV, high fashion, magazines and photography; or make up artists want to learn how to use new materials and painting techniques to add to their skill set; anybody who has never picked up a brush before but has a keen interest to learn this professional skill.
